

# UI / UX Designer

**Location:** Remote

**Type:** Internship, Full-time or Part-time

**Start Date:** TBD

**Company:** [Solarity AI LLC](#) – Dallas, Texas, USA

---

## About the Role

Solarity AI is looking for a **detail obsessed, user focused UI/UX Designer** who loves turning complex ideas into clean, intuitive, and elegant digital experiences. You will work closely with founders, engineers, and product teams to design interfaces for **AI powered B2B platforms** and **B2C mobile applications**.

If you enjoy solving real user problems, designing systems not just screens, and crafting modern interfaces that feel effortless to use, this role is built for you.

This is NOT a coffee-runner role.

This role offers **real design ownership, real product impact, and real portfolio value** inside a very fast-moving AI company.

---

## What You'll Work On

- Designing **UI and UX** for web platforms, dashboards, and mobile applications
  - Creating **wireframes, user flows, prototypes**, and high fidelity designs
  - Translating complex AI and technical workflows into simple, intuitive interfaces
  - Designing experiences for both **B2B enterprise tools** and **B2C consumer apps**
  - Collaborating with engineers to ensure smooth design to implementation handoff
  - Building and maintaining **design systems, components, and style guides**
  - Improving usability, accessibility, and visual hierarchy across products
  - Iterating designs based on feedback, testing, and real user behavior
  - Supporting product launches with visuals, mockups, and design assets
  - Ensuring consistency across platforms, screens, and user journeys
  - Helping define Solarity AI's **design language and brand experience**
-

## What We're Looking For

- Understanding of **UI/UX fundamentals**, usability, and interaction design
  - Experience with **Figma** or similar design tools
  - Ability to design clean, modern, and user centered interfaces
  - Strong attention to spacing, typography, color, and visual hierarchy
  - Comfort creating wireframes, prototypes, and high fidelity screens
  - Ability to explain design decisions clearly and logically
  - Willingness to iterate, accept feedback, and improve designs
  - Self motivated, proactive, and comfortable working independently
  - Experience designing mobile apps or SaaS dashboards
- 

## What You Will Gain

- Real world experience designing products used by actual users
  - Direct mentorship from founders and senior engineers
  - Exposure to **AI product design**, enterprise tools, and consumer apps
  - Experience working closely with developers in real product cycles
  - A strong portfolio of **production level UI/UX work**
  - Experience building and scaling a design system
  - A measurable design impact across live products
- 

## You're Perfect For This If You...

- Love designing clean, intuitive, modern interfaces
  - Care deeply about user experience, not just visuals
  - Enjoy solving product problems through design
  - Think in flows, systems, and interactions
  - Want your designs to actually ship and be used
  - Learn fast, iterate quickly, and value feedback
  - Are excited to shape how people experience AI products
- 

## We Don't Care About

-  Fancy resumes
-  Perfect grades
-  Knowing every design trend

We care about taste, clarity, and your ability to design usable products.

---

## Requirements

- Currently pursuing or completed a degree in **Design, HCI, Computer Science, or a related field**
  - Ability to commit **at least 20 hours per week**
- 

## How to Apply

Send us:

- Your **resume** (it should be written in LaTeX using [this format](#))
- Your LinkedIn profile
- Your **portfolio**
- A short note on why you want to design products at Solarity AI
